COMPUTER LOCKERS FOR FESTIVALS AND BEACHES

Main advantages

1. Automatic lockers implemented on the basis of the computer;
2. 17" full-color touch screen provides intuitive and accessible interface for the user;
3. Administrative panel enables a flexible configuration of the equipment operation;
4. Equipment operation in two languages (Russian, English);
5. Voice assistance;
6. Our company is a direct manufacturer and developer of this equipment.

Our equipment has remote access implemented, which can help to:

- control the automatic system operation;
- receive financial indicators in real time;
- remotely control the locker (open the doors, restart the locker, test the units);
- receive service SMS about the locker operation (breaking-in the cell, paper in the printer has run out, filled bill acceptor, all cells are filled, etc).

We provide round the clock support for our equipment. We consult your service technicians for free. We can enter the equipment remotely, test it, find a failure and eliminate it.

Complies with specifications

GOST 27201-87, GOST 27954-88, DSTU 4113

Computer lockers for festivals and beaches are made in accordance with the requirements of technical regulations on high-accuracy industrial equipment using high-quality materials and reliable components of well-known world manufacturers
